Engagement Heatmap (Day × Hour)

Recommendations to Grow Subscription Base

1. Boost Low-Consumption Days (Mon, Tue, Sun)

- "Monday Night Cricket" — block of ICC Cricket WC replays + new live SuperSport content
- "Sunday Family Movie" — Africa Magic premieres + Cartoon Network kids block 16:00–19:00
- "Tuesday Trends" — Channel O / Trace TV music countdowns with social-vote integration
- Push notifications 1 hour before prime-time slots to reactivate dormant users

2. Content Strategy — Lean Into What Works

- Sport drives 38% of total watch-time → secure rights to PSL, AFCON, Rugby Championship
- Music channels (Channel O, Trace) over-index in 18-34 segment → expand local SA hip-hop block
- Kids block (Cartoon Network, Boomerang) underused weekday afternoons → add school-out specials

3. Audience Expansion Initiatives

- Female audience only 12% of active base → market romance/drama bundle, partner with women lifestyle brands
- Gauteng = 39% of viewing → defend with premium tier; grow KZN, Eastern Cape via local-language content
- 55+ segment <3% → "BrightTV Classics" channel (retro sport, news, doccies) + simplified UI

4. Acquisition & Retention Levers

- Referral program: existing user gets 1 month free for each new sub (target Gauteng power users)
- Bundle with mobile data partners (MTN/Vodacom) — addresses cost barrier in lower-LSM provinces
- Family multi-profile plan to capture full household, increasing stickiness
- AI-driven content recommendations on home screen — surface long-tail catalog
